

Summary of capabilities

Swedesboro, NJ, US

Overview

Thermo Fisher Scientific's transportation facility in Swedesboro, NJ, provides end-to-end logistics and distribution services for drug developers conducting clinical trials. Established to enhance Thermo Fisher's capabilities in managing biotechnology and biopharmaceutical supply chains, the facility has been instrumental in facilitating the flow of client projects globally. This site specializes in the storage, handling, and distribution of temperature-sensitive and time-critical materials, as well as clinical ancillary management.

Clinical ancillary management

The Swedesboro facility is equipped to provide premier clinical ancillary management and logistics services, including global product procurement, storage, and distribution of essential products and supplies for clinical trials. This process ensures that clinical trial sites worldwide receive requisite materials that are in compliance with regulatory standards, with efficiency.

Services include

- Sourcing and procurement of clinical ancillary supplies and equipment
- Project management and client services, including inventory management, distribution, closeout oversight, and logistics and storage management
- Regulatory review and oversight
- Product selection consultation and review

Site advantages

- **White glove services:** We collaborate with clients to help navigate the entire process.
- **Prime location:** Strategically located near four major airports for easy logistics coordination.
- **Fast delivery:** Seamless support from first mile to last mile and everything in between.
