

Oral solid dose

Bend, Oregon, US

# Advancing compounds through early development

As a center of excellence for solubility enhancement, advanced drug delivery, and early development, Thermo Fisher Scientific's [Bend, Oregon](#) facility is helping innovators move molecules forward with confidence.

**215**  
compounds  
developed using  
Quadrant 2™  
modelling

**42**  
compounds  
transferred  
across our global  
network for  
**scale-up** and  
late-phase work

**10**  
products  
commercialized  
with 60% remaining  
in the Thermo Fisher  
network

**50%**  
of modeled  
compounds  
advanced into  
follow-on  
development

**77**  
clinical  
products  
manufactured  
and released  
from 2015-2025

**52%**  
of projects  
completed in  
9 months or less

Experience at scale helps innovators reduce risk, accelerate timelines, and bring more treatments to patients.
